

Methodological triangulation

Led by the users of the space,
the local experts

3 ways of looking at the same object

- Narrative interviews and workshops
 - Complete picture of how community experiences SSC
 - May be influenced by underlying non-acoustic concerns, strategy, resonance
 - Limited sample of people
- Questionnaire survey
 - Comparability across populations, regions, ...
 - Large sample size
 - Limited in scope, may miss important unforeseen aspects
- Sound analysis
 - Detect actual presence of sounds, frequency of occurrence, ...
 - Can be modelled, predicted
